

The Skills for the Jobs of the Future

Date: 16th of November 2023

ECWT in the framework of ECoVEM, in collaboration with its Polish and Ukrainian partners, took part in a conference focused on reskilling and upskilling vulnerable workers in various digital sectors. The conference, hosted by Sumy State University and Ignatianum University of Krakow, received support from NATO's Science for Peace and Security (SPS) program. The event, held on November 16, 2023, aimed to address the future of digital jobs, including AI, renewable energy systems, green technologies, cyber security, and microelectronics.

Discussions centered on the topic of increasing the participation of women in the fields of cyber security and microelectronics, with particular attention paid to the requirements of Poland and Ukraine. ECWT, along with its strategic partners, has emerged as a pivotal force in facilitating the knowledge transfer process. By carefully addressing the identified needs and bridging the gaps in skills and competence, they are positioned to make a significant impact in the years to come.

The photo presents selected panelists and educators and female participants in the Krakow City Town Hall with the president of the City of Krakow Prof. Jacek Majchrowski.
